Managing the state of large-scale web applications is a highly challenging task with the need to align different components, backends, and web workers harmoniously. When it comes to Angular, you can use NgRx,

which combines the simplicity of Redux with the reactive programming power of RxJS to build ...

Architecting Angular Applications with Redux, RxJS, and

A little while back I found myself needing to handle file uploads without touching the application server. This is a common scenario for people using Heroku as they limit all requests to 30 seconds, which in theory sounds fine for most requests, but destroys any chance you have at directly handling file uploads within your application.
