Activities. Distinguish between chemical and physical changes with this "Changes in Matter" activity. Prepare unknown samples of heterogeneous mixtures, homogeneous mixtures (solutions), and pure substances, then use this "Classifying Chemicals Using Properties" activity. It includes an evaluation in PDF form.

3 Laying the Corner Stone: It is the best of times and it is the worst of times for chemistry. Lavoisier and the foundation of a modern science. Gypsum and "fixed water" anticipate the phenomenon of "fixed air."

#### **A BRIEF HISTORY OF CHEMISTRY - Research Institute for**

In chemistry, the valence or valency of an element is a measure of its combining power with other atoms when it forms chemical compounds or molecules. The concept of valence developed in the second half of the 19th century and helped successfully explain the molecular structure of inorganic and organic compounds. The quest for the underlying causes of valence led to the modern theories of ...

Climate change feedback is important in the understanding of global warming because feedback processes may amplify or diminish the effect of each climate forcing, and so play an important part in determining the climate sensitivity and future climate state. Feedback in general is the process in which changing one quantity changes a second quantity, and the change in the second quantity in turn ...
