Honors Chemistry is designed for students who have demonstrated strong ability in previous science courses. In this fast-paced, demanding course, the main topics--which include atomic theory, nuclear chemistry, periodicity, chemical reactions, stoichiometry, gases, solutions, reaction kinetics, equilibrium, acid-base theory, oxidation-reduction, and organic chemistry--are studied at an ...

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Current Unit. Modern Atomic Theory (Chapter 11)--Ideas about the structure of matter have changed considerably over the centuries. Why, the current model of the atom is only about 100 years old! In this unit, we will become familiar with important experiments done by famous scientists, whose work helped us better understand the nature of the atom.

Atmospheric chemistry is a branch of atmospheric science in which the chemistry of the Earth's atmosphere and that of other planets is studied. It is a multidisciplinary approach of research and draws on environmental chemistry, physics, meteorology, computer modeling, oceanography, geology and volcanology and other disciplines. Research is increasingly connected with other areas of study such ...

Solutions: Dilutions. Page 3 Note about  $V_c$ , and a hidden assumption.  $V_d$  is simple enough; it is the amount of the dilute solution you are making. It may be tempting to think that  $V_c$  is the amount of the concentrated solution you have. WRONG. It is the amount you use.

4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.
