Alarm System Store - DIY Security Equipment for Home

A fire alarm system has a number of devices working together to detect and warn people through visual and audio appliances when smoke, fire, carbon monoxide or other emergencies are present. These alarms may be activated automatically from smoke detectors, and heat detectors or may also be activated via manual fire alarm activation devices such as manual call points or pull stations.

Fire alarm system - Wikipedia

Oftentimes, to properly troubleshoot, we need access to the system programming and monitoring settings. Also, we tend to get posts on our pages from existing customers using unknown emails.

Honeywell VISTA 15P, 20P Programming Guide - Alarm Grid

Fire alarm pull station. A fire alarm pull station is an active fire protection device, usually wall-mounted, that, when activated, initiates an alarm on a fire alarm system. In its simplest form, the user activates the alarm by pulling the handle down, which completes a circuit and locks the handle in the activated position, sending an alarm to the fire alarm control panel.

Manual: Rosemount 8732 Integral Mount or Remote Mount

I bought this to replace a faulty sensor on my ADT Quick Connect system. Of course, ADT wanted \$100+ to send a guy out to punch in the code to activate the new sensor. I asked them to give me instructions on how to setup the new sensor and they refused (because according to them, they have to supply me with one, so they can charge me double or triple what this honeywell 5816 is worth)
